

Standard Edition

Make more out of your forms

The Standard Edition of Monday Webforms lets you turn static forms into dynamic interactions. These new forms use conditions and rules to respond to answers given by your customers.

With Webforms, creating forms has never been simpler. The look and feel of the form manager is perfectly matched to the FirstSpirit ContentCreator, so it instantly seems natural and familiar. Use the intuitive interface to create multi-page and branching forms – and still with no knowledge of coding.

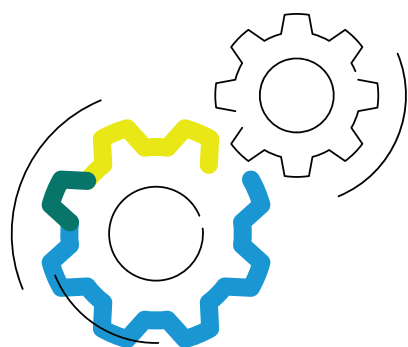

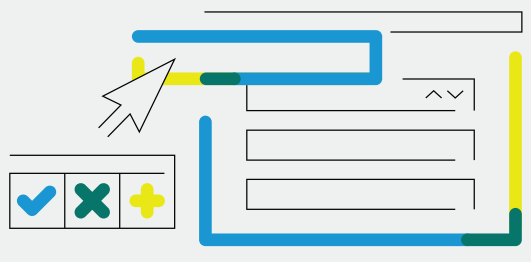

Make the form fit the customer

Take your customer communication to the next level. Introducing conditions lets you hide fields that are irrelevant, while calculated values steer your customers directly to their chosen destination. Your customers only see the fields and pages that make sense for them.

Multi-page forms

Want to create forms for complex workflows quickly and easily? Then we'd recommend Monday Webforms Standard Edition. This version offers all of the functions you need to create product finders or set up customer surveys.

Automate your engagement

Monday Webforms offers you a range of submit actions to automate your customer communications while also saving you a lot of work. From redirection to confirmations, sending mail or integrating with the Webforms Analytics extension, Monday Webforms saves you time while ensuring an optimum response to the form data you receive.
